All India Weather Inference Based on 1730 hours IST Observations
(NIGHT)

- ❖ The **Western disturbance** as a trough in middle tropospheric westerlies with its axis at 5.8 km above mean sea level roughly along Long. 68°E to the north of Lat. 32°N persists.
- ❖ The **cyclonic circulation** over northeast Assam extending upto 1.5 km above mean sea level persists.
- ❖ The **well marked low pressure area** over southeast Bay of Bengal and adjoining East Equatorial Indian Ocean persisted over the same region at 1730 hours IST of today, the 24th November 2024. It is likely to move west-northwestwards and intensify into a depression over central parts of south Bay of Bengal on 25th November. Thereafter, it is likely to move northwestwards towards Tamil Nadu-Sri Lanka coasts during subsequent 2 days.
