

## FAQs on #COVID – 19

by Dr. Naresh Trehan

### Can drinking/rubbing alcohol on your body kill coronavirus?

NO. Spraying alcohol or chlorine all over your body will not kill viruses that have already entered your body. Spraying such substances can be harmful to clothes or mucous membranes (i.e. eyes, mouth). Be aware that both alcohol and chlorine can be useful to disinfect surfaces, but they need to be used under appropriate recommendations.
