1. Introduction: .1

Kupwara is the backward frontier District of Kashmir Valley, full of scenic beauty. Dense forests and rich wild life make it significant from tourism and wildlife point of view. Nature has been very kind to Kupwara. District Kupwara was carved out from erstwhile District Baramulla in the year 1979. The District Headquarter "Kupwara" is situated at a distance of 90 kms from the summer capital of state, i.e. Srinagar. The District is situated at an average altitude of 5300 feet from the sea level. The geographical area of the District is 2379 sq kms. The north west part of the District is bound by line of actual control (L.O.C) while the southern portion is bound by the District Baramulla. There are three bad pocket areas, namely, Machil, Keran and Karnah located near L.O.C which remain land locked for more than six months in a year. There are some other areas located at barbed distances and remain cut off from District Headquarter for a considerable time, like Kumkadi, Lashdat, Jungund, Kethanwali and Budnambal.

Administration:

Kupwara district comprises of 03 Sub Divisions viz., Handwara headed by Addl. Deputy Commissioner, Tangdar Karnah and Sogam Lolab; 16 Tehsils, viz., Kupwara, Handwara, Sogam, Lalapora, Trehgam Kralpora, Villgam, Tarathpora, Zachaldara, Qaziabad Kralgund, Langate, Karnah, Keran, Machil, Qalamabad, Drgumulla ,

The District has 26 Community Development Blocks, and 05 Assembly Constituencies, viz., 1-Karnah, 2-Kupwara, 3-Lolab, 4-Handwara, 5-Langate.

PROFILE OF THE DISTRICT

2-Geography:

Kupwara is backward frontier district of Kashmir valley located between 34.17 to 34.12 north latitudes and 73.16 east longitudes at an attitude of 5300 meter above level. Operational Guidelines: Do's and Don'ts: **Operational Guidelines (Do's & Don'ts):**

A. Earthquakes: Preparedness

Earthquake strikes suddenly, violently and without warning. Identifying potential hazards ahead of time and advance planning can reduce the dangers of serious injury or loss of life from an earthquake.

Before: Checks for Hazards in the home

- ◆ Fasten shelves securely to walls.
- ◆ Place large or heavy objects on lower shelves.
- ◆ Store breakable items such as glass, and china pot etc. in low, closed cabinets with latches.
- ◆ Hang heavy items such as pictures and mirrors away from beds and anywhere people sit.
- ◆ Brace overhead light fixtures.
- ◆ Repair defective electrical wiring and leaky gas connections. These are potential fire risks.
- ◆ Secure a water heater by strapping it to the wall studs and bolting it to the floor.
- ◆ Repair any deep cracks in ceilings or foundations.
- ◆ Get expert advice if there are signs of structural defects.
- ◆ Store weed killers, pesticides, and flammable products securely in closed cabinets with latches and on bottom shelves.

Identify safe places in each room

- ◆ Under sturdy furniture such as a heavy desk or table
- ◆ Against and inside wall
- ◆ Away from where glass could shatter around windows, mirrors, pictures or where heavy bookcases or other heavy furniture could fall over.

Locate safe places outdoors

- ◆ In the open, away from buildings, trees, telephone and electrical lines, overpasses or elevated expressways.
- ◆ Make sure all family members know how to respond after an earthquake.
- ◆ Teach all family members how and when to turn off gas, electricity, and water.
- ◆ Teach children how and when to call police, or fire department and which radio station to tune for emergency information.

Have disaster supplies in hand

- ◆ Flashlight and extra batteries.
- ◆ Portable battery-operated radio and extra batteries.

- ◆ First aid kit and manual
 - ◆ Emergency food and water
 - ◆ Essential medicines
 - ◆ Cash
 - ◆ Sturdy shoes
- develop an Emergency Communication Plan In case family members are separated from one another during an earthquake (a real possibility during the day when adults are at work and children are at school), develop a plan for reuniting after the disaster. Ask an out-of-state relative or friend to serve as the “family contact”. After a disaster, it’s often easier to call long distance. Make sure everyone in the family know the name, address and phone number of the contact person.

During:

If indoors

- ◆ Take cover under a piece of heavy furniture or against an inside wall and hold on
- ◆ Stay inside
- ◆ The most dangerous thing to do during the shaking of an earthquake is to try to leave the building because objects can fall on you.

If Outdoor

- ◆ Move into the open, away from buildings, street lights, and utility wires.
- ◆ Once in the open, stay there until the shaking stops. If in a Moving Vehicle
- ◆ Stop quickly and stay in the vehicle
- ◆ Move to a clear area away from buildings, trees, overpasses, or utility wires
- ◆ Once the shaking has stopped, proceed with caution. Avoid bridges or ramps that might have been damaged by the quake.

Be prepared for Aftershocks

Although smaller than the main shock, aftershocks cause additional damage and may bring weakened structure down. Aftershocks can occur in the first hours, days, weeks, or even months after the quake.

Help injured or trapped persons

- ◆ Give first aid where appropriate. Do not move seriously injured persons unless they are in immediate danger of further injury. Call for help.
 - ◆ Listen to a battery-operated radio or television for the latest emergency information.
 - ◆ Remember to help your neighbours who may require special assistance - infants, the elderly, and people with disabilities.
 - ◆ Stay out of damaged buildings. Return home only when authorities say it is safe.
 - ◆ Use the telephone only for emergency calls.
 - ◆ Clean up spilled medicines, bleaches or gasoline or other flammable liquids immediately. Leave the area if you smell gas or fumes of other chemicals.
 - ◆ Open closet and cupboards doors cautiously.
 - ◆ Inspect the entire length of chimneys carefully for damage. Unnoticed damage could lead to a fire.
- Inspecting Utilities in a damaged Home.

Inspecting Utilities in a damaged Home

- ◆ Check for gas leaks if you smell gas or hear blowing or hissing noise, open a window and

quickly leave the building.

- ◆ Look for electrical system damage if you see sparks or broken or frayed wires, or if you smell hot insulation, turn off the electricity at the main fuse box or circuit breaker.
- ◆ Check for sewage and water lines damage. If you suspect lines are damaged, avoid using the toilets and call a plumber. If water pipes are damaged, contact the PHE/Municipality and avoid using water from the tap. You can also obtain safe water by melting ice cubes.

B. DO'S AND DON'TS ON FLOOD

- ◆ Move to the safer place or highlands with dry food/baby food/ and potable water on receipt of warning.
- ◆ Valuable household articles/documents etc. to be tied to a high roof or concealed with polythene in deep underground for safety. Insure any household articles.
- ◆ Move the cattle to a safe place/high land with ample fodder and drinking water.
- ◆ Listen to radio for detail and latest news warning on flood
- ◆ Turn off all the electrical systems and equipments
- ◆ Disinfect the drinking water before use and keep the food covered always
- ◆ Beware of snakes
- ◆ Don't venture out from the shelter/safe place. Don't mess up the living place.
- ◆ Keep surrounding clean and hygienic.
- ◆ Don't take stale food. Take dry food as far as possible.
- ◆ Don't create and believe in rumors.

C. DO'S AND DON'TS ON FIRE

- ◆ Dial the nearest Police Control Room or Fire Station the moment fire breaks out. Inform District Control Room as well. Always remember their phone numbers or you may indicate it in a calendar or on wall where all the family members can see.
- ◆ Never allow children to handle match box/lighter
- ◆ Don't run if your dress catches fire. Roll on the floor and try to put out the fire.
- ◆ Don't wear synthetic dress/sarees while cooking.
- ◆ Put the hearth completely out when cooking is done.
- ◆ Cling to the floor to escape from smoke and fire.
- ◆ Don't throw a burning cigarette/biri here and there
- ◆ Rescue team must know where to get buckets, water, sand, long bamboo, etc. to extinguish fire.
- ◆ Switch off the cylinder valve when not in use and/or follow all instructions for using gas cylinder/stove.

D. Landslide Do's:

1. Maintain drainage system (pipes, ditches, etc., on your property and keep street drains free of leaves and debris).
2. Direct storm water away from steep slopes, if possible.
3. Perform periodic inspections of property before winter and during storms keeping safety as the #1 concern.

4. Check weep holes on walls and keep them open.
5. Be alert during and following storms.
6. If you have an irrigation system, shut it off and check it out seasonally.
7. Keep fill and yard waste off slopes.
8. Leave stumps in the ground on slopes.
9. Call a professional, if you have questions or a problem!

Don'ts:

1. Don't direct storm or other water onto a slope.
2. Don't denude vegetation on slope without a re-vegetation plan.
3. Don't cut into the toe (or bottom) of a slope.
4. Don't remove tree stumps from slopes.
5. Don't install a permanent irrigation system in landslide-prone areas.
6. Don't put fill or yard debris on a steep slope.
