

DISTRICT DISASTER MANAGEMENT PLAN

2022

DISTRICT DISASTER MANAGEMENT AUTHORITY,

COLLECTOR OFFICE, PARBHANI.

Preface:

Disasters are often sudden and intense in considerable destruction, injuries and death, disrupting normal life as well as the process of development. For an effective disaster management and capacity building, joint efforts and active participation of administrators, social leaders and citizens is imperative. Also, the government of Maharashtra has started focusing the disaster management and related aspects very intensively in recent time. Hence it is essential to prepare the district disaster management plan for the Parbhani district intended for an effective response to emergencies and disasters. Authorities of village, Taluka, and district level have prepared this summary document which furnishes details about the hazards, risks, vulnerability analysis, risk assessment, disaster preparedness and disaster relief. This plan will definitely facilitate to encourage effective training, coordination and planning for disaster response at district level.

It also outlines the flood response plan, warning system, communication system, search and rescue, relief operations and contingency plans.

I am delighted to release the “District Disaster Management Plan” for this year. And I hope this will go a long way in serving the district administration in directing, supervising and monitoring disaster relief measures.

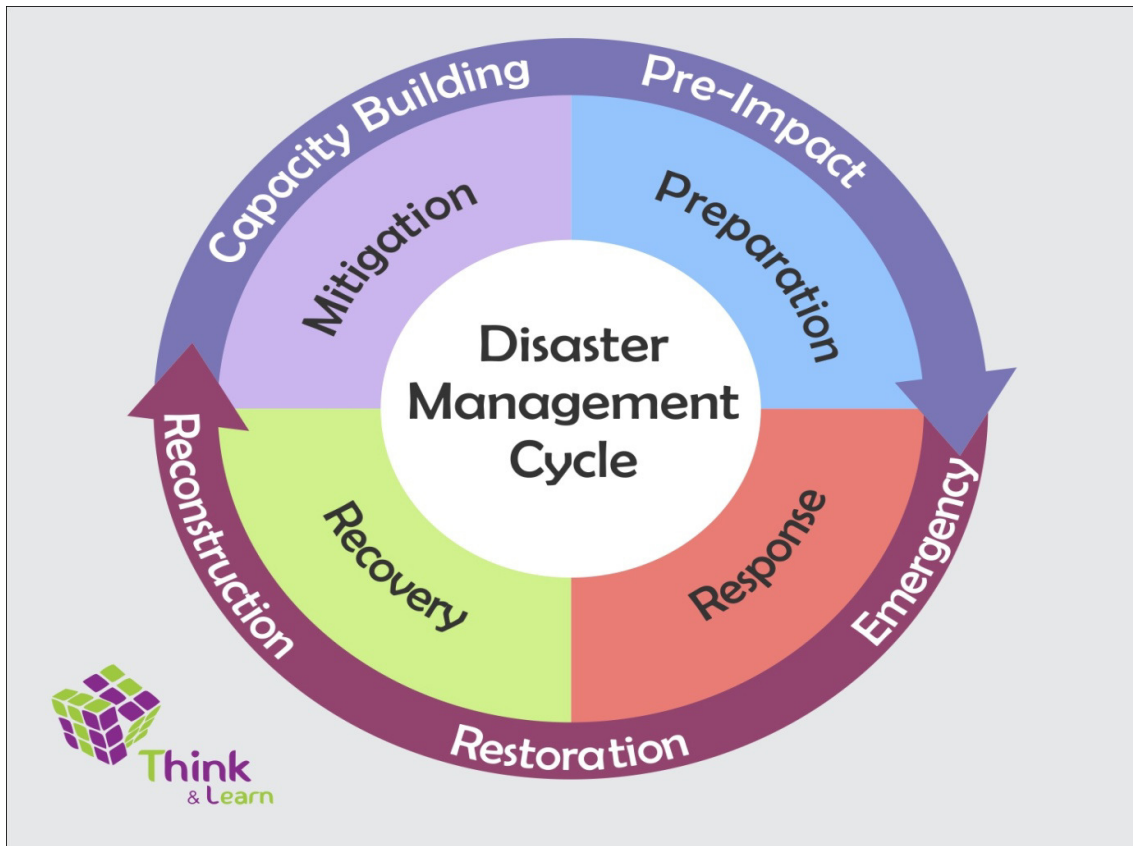

(Aanchal Goyal, IAS)
Collector and District Magistrate, Parbhani

In recent years, the Government of Maharashtra has been giving increased focus towards the Disaster Management and related aspects. As a part of Disaster Risk Management, all the Villages, Taluka's and City in the Parbhani district have prepared their Disaster Management Plans and are being updated every year. The District Disaster Management Plan is a summary document giving the details about the hazards, its history, vulnerability analysis, risk assessment and flood management strategy and mitigation plan. It also outlines the flood response plan, warning system, communication system, search and rescue, relief operations and contingency plans. We have tried to include the District related information, Risks and Preparedness against risks, responses at the time of disasters as well as Disaster Management and strategy during the disaster etc... for Parbhani District.

This Plan is updating periodically, and also we are improving it through our draw backs, errors and new lessons learnt.

I hope that this document shall go a long way in helping the district administration in tackling the disaster situations in a systematic and smooth manner.

(Mahesh Wadadkar)
Resident Deputy Collector, Parbhani

Introduction:

The ancient times Parbhani was known by the name of Prabhavati nagari. Parbhani is one of the 8 districts of Marathwada region of Maharashtra state, which is situated on the Deccan Plateau of Maharashtra State. This district is situated on the eastern side of Maharashtra state. Area of Parbhani district is 6214 sq. Km. that's it.

The normal height of the district is 457 meters above sea level. The highest part of the district is located in the Ajantha Mountain on the west side of the district; its height is 579.70 meters. The lowest part of the district is 366 meters east of the district, where Godavari River crosses the district boundary. From west to east, it is clear that there is a general slope.

Godavari is the main river in the district. Due to the deployment of the Godavari river, its area has become fertile due to its catchment. Based on the rainfall in Maharashtra, Parbhani district is a rain-fed district. That is why the main business of people is agriculture. Four crops are mainly grown in the district during the Kharif season of Jowar, Kapus, Mugh and Soyabean. During the June to September period, southwest monsoon helps in increasing the crop yield. Due to the availability of adequate land requirement and due to good weather conditions, rain falls in the district from the northeast. This rain is ripe, if it is white in rabi season, it is tasty.

Parbhani district provides jawar to Maharashtra, therefore, it is said to be a jowar of Maharashtra. Besides, Tur, Gahu, Bhui Mung and Kardi are widely grown in the district, hence Parbhani district is an important district of Maharashtra for crops. Significant progress of agricultural business in the district is taking place. However, the industrial development in the district is still in infancy. Due to the absence of mineral resources and natural resources, there were no major mass installations. It is also a distant distance from an industrialized industrial center like Mumbai, Pune so allied and other industries have not been created.

The economy of the district is imbalanced due to lack of industry. There are 132 registered factories in the district in 2015-16. Out of the factories registered in the district, 130 factories are operational. Of these, 3657 workers are working. Hence, the industrial backwardness of the district is noticed. In factories of Kapus Jinning Mills, Dalmile and Telgrine, which are used as raw material for agricultural production, have a major share in the factories in the district. Raw material can be available in the district for vegetable and fruit processing industries.

There are 06 private sugar factories operating in Parbhani district. In the five sugar factories operating in the district, in 2015-16, in 1846.30 Tons of sugarcane crushing in 908.90 met.

Tons of sugar were produced. The farmers affiliated with that factory have a lot of income and hence, the development of motor-like establishment is also in the vicinity of the factory. 8498 hectare area in Parbhani district is suitable for fishery business. Out of this 8393 hectare area has been utilized for fishery in 2015-16. Karpara and Masoli are two middle irrigation projects in the district. Improved breed fish like Cutla, Rahu and Mrigal are being produced in their water bodies.

Fish production and sale are organized by 39 cooperative societies. The productivity of the fish caught in 2015-16 is Rs. 230.00 lakhs.

Since agriculture is dependent on rainfall, Parbhani district does not get expected agricultural produce compared to land quality. Hence, efforts are being made to accelerate the development of irrigation scheme in the district. The Jayakwadi project is in Aurangabad district. However, most of the beneficiaries are benefited from this project in Tehsil for irrigation. Apart from this, irrigation system is being implemented in the district under the Kripa, Masoli Digras, Mudgal and Mudi medium projects.

In addition, the Borana project, the Majalgaon Project in the district, is also benefiting from irrigation in the district. In addition, the work of milk production in the district has been given to the speed of milk. Parbhani district is very rich in water resources. As the farmland of the district is well fertile, there is abundance of crops. Therefore, agricultural business is an important place in the district economy.

Basic resources are available in the district to increase the production of milk business, fruits and vegetables in Parbhani district. The availability of green fodder in accordance with the available irrigation system in the district, and the availability of fodder fodder from jowar crop of Kharif and Rabi crops is being encouraged in the development of milk business.

Through medium, efforts are being made to accelerate the pace of development of dairy business. But there is a huge market with no major turnover, but fruit and vegetable production is bolstered. Therefore, it is necessary to establish fruits and vegetables in the district and try to increase production.

Location and Geographic Features

Parbhani district is situated in the geographical region of 18.45 to 20.01 north latitude from 76.13 to 77.26 east longitude. The districts of Buldhana and Hingoli to the north, Jalna to the west, Beed in the south and Latur and Purves Nanded are the districts.

Area and Administrative Department

Parbhani district's total area is 6224 sq. Km. That's it. This district comprises nine talukas of Parbhani District, Gangakhed, Pathri, Purana, Palam, Selu, Sonpeth and Manavat, among the following are four revenue subdivisions in the district as follow

1. Parbhani.
2. Gangakhed.
3. Pathri.
4. Selu.

According to the 2011 census, there are 843 villages in Parbhani district, out of which 830 are inhabited and 13 are in the country. The total number of villages in Tehsil parbhani is 130, jintur 171, Selu 94, Gangakhed 106, Sonpet 57, Manavt 54, Purana 93, Palam 82 and Pathri 56. Parbhani city municipality in the district as well as out of total eight Municipal Councils, Gangakhed NP The rest of the 7 category are in B category. There are 704 Gram Panchayats in the district till the end of 2016. Whose membership is 3042. There are 9 agricultural establishments in the district.

Geographic Features:

In Parbhani district, a quadrangle of Ajanta is located in the Jintur taluka. Because of this queue the Plateau is set up north of the district, the height of the plateau is 1500 to 1600 feet. The plateau has its roots in the southern part of the Dudhna river. Besides this, the height of Balaghat ranges is spread over Gangakhed Tehsil south of the district. Some parts of Pathri, Gangakhed, Palam, Parbhani and Purna tehsils in the district are included in the fertile valley of Godavari river. Some parts of Selu, Jintur tehsil are included in the Dudhana river valley.

Rivers:

Godavari is the main river in Parbhani district and geographically it has its unique importance. Dudhna and Purna are the two major tributaries of Godavari. From Godavari river Pathri, Gangakhed and Palam talukas, westwards, eastwards, 79 km away. Traveling to Nanded district, they enter the district. It travels through the Dudhna river Selu, Jintur, Parbhani and Purna talukas and enters the district of Hingoli. Dam is built at Yeldari in Jintur taluka on the river Purna originated from Aurangabad district.

Weather:

In Parbhani district the weather is mainly dry and dry during the monsoon from June to September. The district receives seasonal monsoon from October to November. From December to February it is winter and March to May summer.

Rain:

Parbhani district is sure to include rainfall. In the recent years from the June to December period, the average length of the southwest monsoon is 804.4 mm. It rains. Apart from this, by the end of October and the end of November, the eastern monsoon is generally 102 mm from the wind. It rains. Not all rain falls in all parts of the district. Rainfall increases from west to west. Parbhani district has an average of 340.48 mm in the year 2015. It rained.

Soil Type:

Parbhani district is a very rich black land in the district which is generally nutritious to the crops. The soil fertility and depth of the district is varied. Considering the soil fertility of the soil, the geographical part of the district mainly falls into three sections. The Godavari river has a very strong and fertile

Land in Selu, Pathri, Parbhani and Purana talukas in the central part of the district and some parts of Zinin taluka are in the middle black. The land in the northern hills of the north and Gangakhed in south and some areas in the Palam taluka is light and medium-sized.

Population:

As per 2011 census, the total population of Parbhani district is 18,36,086, out of which 9,42,870 are male and 8,93,216 are females. Its total population is 51.35 and 48.65 percent.

As per 2011 census, the total population of the district is 29.29% in Parbhani taluka, 15.40% in jintur taluka, 11.05% in Gangakhed taluka, 7.57% in Pathri taluka, 6.3% in Manavat taluka, 4.88% in Sonpeth taluka, 4.88% in Palam 6.29 per cent in taluka, 9.95 per cent in Purna taluka and 9.21 per cent people in Selu taluka.

Population density the ratio of rural and urban population is 68.97 percent of the total population of the district. 53.91 percent of the total 5,69,806 urban population lives in Parbhani city and 8.75 percent of the population lives in Gangakhed II city. As the city is the smallest in the district, it is 2.77 percent people living in the district.

Male and Female Ratio:

According to the 2011 census in Parbhani district, there are 947 women per thousand men. This is 954 and 942 for the rural and urban areas of the district. This figure is less than 16 in urban areas and 04 in urban areas than in 2001 census.

Scheduled Castes and Scheduled Tribes:

According to the 2011 census in Parbhani district, there are 2,47,308 (13.47%) Scheduled Castes and 40,514 (2.21 %) Scheduled Tribes in the district as a whole.

Workers:

According to the 2011 census, the number of persons working in the district is 8,22,797 and the total population is 44.81 percent of the total population. According to 2011 census, 13,259 people are mostly farmers, 29,368 workers 2,271 people working in trade and commerce. The remaining 21,482 are working elsewhere.

Literacy:

As per the 2011 census, 11,57,814 (73.34 percent) of the total population of 15,78,766 people aged 7 years and over in Parbhani district are literate. In the rural areas of the district 763,448 (70.278 %), in urban areas 3,98,366 (80.08 %) are literate. Male and female literacy in the district is 82.64% and 63.63% percent respectively.

The percentage of taluka-wise literacy is as follows. Parbhani is 77.02%, jintur 60.55%, Gangakhed 67.37%, Pathari 70.76%, Purna 73.87%, Palam 71.94%, Sonpeth 69.72%, Manavt 72.58% and Selu 71.59 %.

Residential and family Use:

The total number of residential homes used in the district is 3,61,130. Among them, there are 2,56,399 (70.99 %) rural and 1,04,731 (29.00 %) urban areas. There are 2.78 lakh families in the district, out of which 1.96 lakhs are rural and 0.82 lakhs families are found in urban areas.

Area wise District Income and Per Capita District Income:

For the Parbhani district, the total area for the year 2013-14 is 13,94,824 crores, as per the district wise income and per-capita district income estimates, in the total primary sector A, II sector B and the total area of three regions, So far, the total net income of the district is 12,85,581 crores. Similarly, according to the static (2004-05) price of Rs 7,49, 327 crores, the total net income is 06,86,119 crores.

Limit of District Generation Estimates For the correct estimation of district level income, it is advisable to use the concept of income accumulating the region, even though the result of the financial turnover of the district is not restricted to the district, it is not possible to assess the outward revenue generated from outside of the respective district and from the concerned district. Not coming. Therefore, the estimation of income on the district level has been prepared using the concept of income source method (). The basic information required to prepare district income estimation is still not available satisfactorily. Most statistics are available for primary areas. However, the statistics for other areas are very small. State-wise income is divided into districts based on the index for the areas where the district level data is not available.

Wildlife :

According to the final estimate, in the year 2015-16, the area covered by forest is 101. 48 sq.kms after all, it is 1.62% of the total area of the district.

Forest production:

In the year 2015-16, Parbhani district got revenue income of Rs. 614.00 thousand from the sale of domestic production.

Agriculture:

According to the sustainable use of land in 2015-16, the geographical area of the district is 6,31,115 hectares. Out of them, the area occupied by the forest is 10,180 hectares. Out of the geographical area, 41,653 hectare is not suitable for cultivation. In spite of this being planted this year, there are 24,251 hectare area which has not been cultivated.

Out of the total geographical area, 2,9,656 hectares of the year 1999-2000 are covered by more than one year. The district has an area of 3,61,062 hectares. Out of which, 6,48,045 hectare area has been brought under cultivation, this year more than one crop has been grown in 2,49,051 hectare area.

This area (net area) in 2000-2001 is 1,07,482 hectares in Parbhani taluka and the lowest in Sonpeth taluka is 16,110 hectares. This area (cultivable area) is 1,17,289 hectares in Parbhani taluka and 38,503 hectares in the lowest Sonpeth taluka in 1999-2000.

The percentage of the irrigated area of taluka wise talukas in the district was in 1999-2000 years. Parbhani is 1,25,086 hectares, which has 1,25,722 hectares, Gangakhed 66,013 hectare, patari 55,301 hectares, purana 63,173 hectares and Selu is 81,455 hectares. As per 2000-01 agricultural calculations, there are 2,9,465 landholders in the district.

The total area they hold is 5,18,085 hectares. 99, with 59 land holders holding area less than 2 hectare, they have occupied 1,44,137 fields. Area with an area of 2 to 5 hectares 80,173 holders is 2,35,890. The area holding 5-10 hectares of land has occupied 67,161 zones with 10,666 holders. Holding more than 10 to 20 and 20 hectares are 766 and 42 landholders respectively, and they have occupied 9,126 and 1870 areas respectively.

Area under Different crops:

Crops are grown in both the Kharif and Rabbi seasons in the district. In it, jowar and cotton are the main crops. pulses is harvested in both seasons. The area under this area is increasing day by day due to increasing demand for pulses. Farmer's move to take summer production of groundnut in the irrigated area.

In the Kharif season, the main crops of Jawar, Mugh and rabi season are taken in the district, jowar and gahu. In the year 2015-16, the final estimate was that the area of jowar crop was 11,202 hectares in Kharif season. In rabi season, jowar and wheat were harvested in 1,24,532 hectares and 53,010 hectares respectively.

In the crop year 2015-16, COTTON was the most important crop in the Kharif season of 21,66,495 hectare. During the rabi season, granif crops were grown in 7,500 hectare area. Accordingly, sugarcane crop was being grown in 14,589 hectares area. Production of pulses in Parbhani district in 2015-16 is 22,155 MT. Tons have happened. In 2015-16, cotton production in the Parbhani district has reached 30,890 tonnes.

Fruits and Vegetables:

In Parbhani district, there are 81 veterinary dispensaries, 83 karmit sand centers in the year 2015-16. Under the Government Milk Scheme in Parbhani district, in the year 2015-16, milk milk was collected in 63,40,050 thousand. The total area under cultivation in the year 2015-16 is 4,556 hectares and the total area of vegetable is 4,556 hectares. There is no sufficient market available for industrial backward areas and hence there is no demand for water and vegetable production in the production of irrigation water.

Distribution of chemical Fertilizers:

In the Parbhani District, 2015-16, a total of 96.032 MT of chemical fertilizers were distributed in the year 2015-16. In the Parbhani district, the rest house has been built to keep the farmers in place of the 9 Agricultural Produce Market Committee headquarters. Drinking water system, vacant land for farmers and bullocks, water supply for bullocks etc. Required services have been provided.

In the Parbhani District, in 2015-16, all the arrivals of pulses and turmeric have arrived at 3626.00 tonnes and 2855.55 tonnes respectively.

There are 21 godowns in the district and they are total governmental. Their storage capacity is 10,400 MT. Apart from this, 88 warehouses in 111 godowns have been completed under the Rural Warehousing Scheme and their storage capacity is 11700 MT. Besides, there are 64 godowns under National Cooperative Development Control Scheme, out of which, 3 godowns are under construction.

Apart from this, the agricultural produce market committee has 10 godowns and their storage capacity is 2000 MT. District Market Committee Federation has its own 22 renovations and has a storage capacity of 21250 MT. The Co-operative Utility Warehouse has a total of 59 warehouses with its own rented and construction rentals. Their storage capacity is 72008 MT.

Irrigation:

In Parbhani district, up to the year 2015-16, the area below the area is 1,361,592 hectares, and the well-irrigated area is 47,040 hectares.

Area under cropwise wet Area:

In the year 2015-16, under wheat and jawari crops, under the area of various pests, there are 14,300 hectares and 70,400 hectare area under wetlands respectively.

Animal Husbandry and Veterinary Services:

The number of animals in Parbhani district is 06,21,788 according to the number of animals taken in 2012. There are 1,68,360 poultry birds in poultry business in the district. This business does not appear to be expected.

Production from livestock:

In the Parbhani district, there are 11 official slaughterhouses in the year 2015-16, in which the bullocks, buffaloes, sheep, goats and goats are slaughtered. In this year 0(zero)bulls, 982 buffaloes, 5846 goats and 1017 sheep were slaughtered.

Veterinary service:

Parbhani district has 30 dispensaries, 51 veterinary centers, 83 artificial conception centers in 2015-16. There are 4 milk processing centers in the district. In which 32,000 liters of milk can be chilled per day. Distribution of milk in Parbhani, Jintur and Gangakhed talukas,

which are collected in the district, is distributed. Due to low demand for milk in the district, milk is supplied to produce milk powder and other materials outside the district.

Fishery Business:

In the Parbhani district, in the year 2015-16, the average amount of fresh water variety is 230 lakhs. Tons of fish were produced. In total production, the three breeds of Cutlass, Rahu and Mrigal have a big share. 8,498 hectare area is suitable for fishery in the district. The 8,393 hectare area is actually used for fishery.

Out of these, the reservoirs of Yeldari's reservoir and the Masoli medium of Karrapara and Masoli medium under 100% of the total water bodies are suitable for fishery fishery. There are 39 co-operative societies of the district with total 1,427 members and thereby organize fishery business in the district.

Electrification:

Electrification of all the cities and villages of Parbhani district has been completed. In the year 2015-16, electricity consumption in the district was 8,76,958 thousand kilowatt hours. Out of this, 1,46,383 thousand kilowatts for domestic use, 11,284 thousand kilo meter for commercial and small power.3,192 thousand KVs for the industry 36,448 thousand kgs for agriculture For the rest of the work, 46,646 thousand KW Electricity was used.

Mineral:

There is no major mineral reservoir in the district. However, the sand and stone sheds required for the construction work are available and excavated according to their requirements. Besides this, the soil stock required for the preparation of bricks is abundant in the district.

Industry:

Out of the 166 factories registered in the Indian Regulations,1948/2006, in the district, 92 were closed. A total of 3657 workers are working in 74 factories.

Roads and communication:

At the end of March 2016, the total area of the district is 6008.29 km under the Municipal Council, Zilla Parishad and the State. There are long road junctions. Out of them, the cement concrete is 303.49 km. Dambari 3220.12 kms. Paved roads of 1256.02 kms. Are lengthy. Of them, 1797.67 km Length of road maintenance through Public Works Department, 3201.02 kms. The maintenance of length of road is maintained by the Zilla Parishad, 602 km. The road length is being preserved through Municipal Council. National highway in the district is 77.15 kms. That's it. The length of major district roads and other district roads in the district is 1745.93 km. That's it. If the road length in the village is 3063.07 km.

Registered Motor Vehicles:

At the end of March 2016, the number of vehicles registered in the district is 02,50,058. At the end of March 2016 there are 22,426 freight vehicles in the district.

Travel Freight:

Parbhani is the district headquarters of the city whereas Parbhani is a railway junction on Mumbai and Kachiguda, Parli, Parbhani, Bangalore broad gauge routes. In the year 1994-95, the broad gauge route of Parbhani Manmad Mukhed was started. Therefore, the direct contact of the district is facilitated with a large city like Mumbai and a large market has been made available to the perishable commodities in the district and in turn, the district is expected to reduce the backwardness of the district by increasing the industry. In the district, in the year 2015-16, total 20,065 kms. On the 259 route length, the passenger traffic was made by 244 route transport buses. The corporation has to pay Rs. 87653.32 lakh rupees have been generated. Every day, averages of 0.87 lakh passengers were freighted, and the average income received by the Corporation was Rs. 2410 per passenger.

Post Offices & Telephone:

At the end of March 2016 there are 194 post offices in Parbhani district. There are 12 post offices per lakh population of 2016 in the district. As of March 2016, there are 10,501 telephone stations in Parbhani district.

Telecasting and Radio:

Telecasting Station has been implemented from Parbhani on 15th September, 1994. So, about 20 km. The people in the vicinity get telecentre benefit. Also, the All India Radio is also available at Parbhani.

Employment and Exchange:

Parbhani is an employment exchange center at the district headquarter. In order to register for the registration of 3 candidates who wish to get the job, the traveling squad of this office registers the registration of the candidates at the respective time interval at each taluka. At the end of March 2016, 81,316 candidates were registered on the basis of their names. In the year 2015-16, only 1363 candidates out of 266 public and 1629 private sector candidates got jobs.

Economic Calculations:

According to the financial calculation of the district in 2013, there are 59,812 agricultural and non-agricultural industries. Of these, 15009 (25.09%) (74%) are self-employed industries and 9765 (26 percent) are in the establishment. Out of the total 59812 industries, 6120 (75%) of rural and 5505 (25%) are in urban areas. 8.35 percent Scheduled Castes and 3.75 percent of the total belongings belong to Scheduled Tribes. Classification by Industry Group:

The groupwork information about how many workers work in each industry group is given. In total 59812 industry employs 106363 total workers. Most of the industry, retail trade, 27295 (25.67%) of the collective, social and personal service in 20111 (18.91%) of the

object created in 4710 (22 per cent), while the rest of 58957 (55.42%), industry, agriculture, mineral production, power and gas, water, construction There are areas of aggravated business storage and so on.

Co-operative sector Establishment:

According to the financial calculation, the total co-operative industrial establishment in the district is 111, out of which 88 rural and 23 in urban areas. Among them, there are 106363 in rural areas and 49976 where an urban area has 56387. The percentage of industries operating in the cooperative sector of the whole industry is only 0.19%.

Banks:

At the end of March 2016, there are 160 branches of the classified banks and their total deposits will be Rs. There are 334194.00 million.

Cooperative:

At the end of March 2016, there are 2, 264 cooperative societies of all kinds in the district. By the end of 2016, 900 thousand members of these institutions have paid capital of Rs 60011.78 thousand rupees. Parbhani district has 82 milk processing companies out of a total of 2264 branches. There are 135 workers contractor organizations.

Retail prices:

In the year 2016, the average price of rice per kg is Rs. 41.50, wheat (medium copy) 16.50, jowar (white) Rs. 14.25 per kg, turmeric 60.25 rupees, turndial 64 Rs.25, Sugar (open market) Rs 35.75, groundnut oil Rs 137, Plant tupa (Dalda) Rs 75.50 That's it. Prices of indigestible items cost soap (lux) 20.00 like this.

The consumer price coordinates:

In the month of July, the general index for Consumer Empowerment for Aurangabad program is 204, 2001 is the basic year for the above index.

Schools:

At the end of 2015-16, there are 1963 primary schools and 426 secondary schools in the district whereas 219 are of higher secondary and 80 colleges. In the year 2015-16, there

are 63287 secondary schools 3,11,271 primary schools and 63,278 students in higher education. In the year 2015-16, the number of teachers in primary school is 12,060 and the number of secondary teachers is 4,650.

Health service:

In the district 2015-16, there are 12 hospitals of Government and Government assisted institutions, primary health centers 37, and primary health sub-centers 214. All the above health institutions have 676 beds, out of which 280 are for women and 190 for children and 143 are doctors and 251 nurse. In 2015-16 01,04,948 patients have been provided medical services and 813114 have been provided to outpatient patients. In the year 2015-16, 31,954 births have been registered and the number of deaths is 5625.

Family Welfare Program:

There are total 43 family welfare centers in the district. In 2015-16, 4915 persons were discharged. Of these, 4893 are female and males are 21. By the end of March 2016 the number of disabled couples is 41410.

Water supply Through Tap:

In the year 2015-16, 830 villages of the total 517 villages in the district have been provided 12 months of drinking water. Similarly, the remaining 224 villeges tanker provided water.

Information:

In the district, there are 7 municipal councils and one municipality in the district during the year 2011-2016 and their total income is 23148 lakh. The total expenditure of all civil institutions in the year 2015-16 in the district is Rs 1,703 lakhs.

Out of this, Rs. 1081 lakhs have been spent on general public health and soya facilities for general public administration.

The total income of Zilla Parishad in the year 2015-61 was Rs 77275 lakh. The total cost is Rs 58237 lakhs.

In the year 2015-16, there are 704 gram panchayats in the district and their total income is Rs 11752 lacs. The cost is Rs 8738 lakhs.

Police and Crime:

There are 19 police stations, 08 out posts, 27 sub-posts and 164 lock-ups in the district in the year 2015-16. The total number of total police force is 3522.

And following are the details.

Entertainment:

The district has 11 permanent and 3 floating theaters in the year 2015-16. Apart from this, there are 33 government video centers. Apart from this, the play house has been built in Parbhani. Many entertainment events are taking place through the open playground at Selu. There is a swimming pool in Parbhani and it has been opened for the public for the registration fees.

Tourism:

Jambulbet is a scenic place in the Godavari area of Palam taluka in Parbhani district. Parbhani also has a dargah of Tilatipir of Sayyad Shah Tunabul Haq. Every year, on February 2, the big Urus is filled.

Objective of ddmap:

1. The purpose of District Level Action Program is as follows.
2. Raising level of preparedness for district level disaster management, analyzing the risks and adverse conditions and analyzing the disaster situation and minimizing the financial losses at a minimum level.
3. With the current status of available resources and facilities, coordination between the organizations / organizations in disaster management, strengthening the district administration, and making positive impact on the overall development of the district.
4. To make the disaster action program modern using updated technology. Its advantage will be in the quick help process. Including Remote Sensing, GISE To use.
5. Study various aspects of disaster reduction and use it in the development of tools.
6. Developing frameworks of appropriate documents for the prevention of future calamities in the district.

7. Implementation of Government Policy by Creating Effective Control System:

Whenever calamities are encountered without any emergency plan, then it is possible to ignore unnecessary work and neglect the important work. The main purpose of any disaster management is to identify the disaster or to predict the prediction to maximize potential harm. Therefore, there should be a proper plan for disaster management. It covers the following.

1. Prior planning by sequential responses
2. Assign responsibility to the participating organizations
3. Develop standardized procedures for emergency work
4. Storage of available resources and facilities
5. Effective management system of resources
6. To coordinate properly with government machinery and social organizations (NGOs)
7. Coordinating with the state government system
8. Control and monitor the search and rescue operations.

Improvement of the district level by evaluating and evaluating the potential disasters that can happen in the district and thereby avoiding the loss of human and financial resources during the disaster period.

- To get access to the facilities available to the participating organizations in disaster management programs and to use them to increase the efficiency of the district administration in disaster management, this information helps the district administration to face the disaster efficiently and create trust in different levels of society.

- Use various information prepared by the emergency action plan for various developmental schemes in the district.
- To make use of scientific and technical information such as geographical information system, remote sensing system (etc.), and for long term developmental planning.
- Keeping the layout in mind to keep the information about the catastrophe that can happen in the future in the district. Updating information, adjusting feedback responses and suggesting new improvements and creating a network of related information.

If the district disaster management action plan is not utilized for various policies of the Government of Maharashtra, then there is a possibility of disaster relief work. There is a possibility that there is an unnecessary emphasis on some issues and there is a possibility of neglecting some of the issues.

The purpose of the Disaster Management Action Plan is to focus attention on the disaster-prone areas and to manage the disaster affected areas, not to minimize risks, environmental, and financial loss. Disaster management plan is required for this.

District Disaster Management Plan:

The main objective of the District Disaster Management Plan is to stay active and coordinated during the disaster period in the district. Even if the earthquake, flood, electricity, storm, fire, etc. are not in our hands, if it is not in our hands, it can be possible to reduce the losses due to proper planning.

The purpose is to make available the tools available while working at the war level, to reduce the confusion, and to coordinate all the components at all levels. All calamities are considered in Eg If there is a large number of lives and financial losses like earthquakes, floods, infectious diseases, factory accidents, fire accidents, and earthquakes, there is a high risk of infectious diseases. In any case, there is a need for greater coordination and manpower management in this disaster management. Apart from this, effective action will not be taken to prevent disaster relief.

If the current plan is a multi-response plan, then it will provide an outline of the institutional framework during the disaster period and help in how it works. This plan provides guidance on how to help the participating agencies during and during the disaster.

Institutions or direct working organizations have to work according to the nature of disaster. However, disaster management at the level of the level is very similar in the level of the district level or the level of control.

S.No.	Subdivision	Tahsil's name		
1	Parbhani	Parbhani		
2	Gangakhed	Gangakhed	Palam	Purna
3	Selu	Selu	Jintur	
4	Pathari	Pathari	Manwat	Sonpeth

Disaster management plans have been prepared for the entire 852 villages in the district. This includes the history of potentially augmenting the content of potential threats and disasters. Also the population of the village, school, high school, colleges, Anganwadi, social workers, courtyard offices, vacant Godaouns, safe residence for temporary residence, hospital, public health center, primary Health centers, veterinary clinics, medical officers, medical personnel, veterinary officers, private medical dispensaries, charitable organizations, swimmers' names, telephone numbers available in the villages, medical shops, cheaper shops, electric generators, focus lights, flashlight, radios, Collect information about mega phones, sirens, buses, jippes, tractors, trucks, JCB machines, boats, bikes etc. Has been found. This information is mentioned in the various supplement attached to this plan. Blanket Supplier, Wood Supplier, Bamboo Supplier, Wholesale Foodstuff, Tents Supplier, Khajeej Patra and. Cit Supplier, Private Transport Organization, Water Supply, Blood Bank, Mat Supplier, Iron Pipe Supplier, Rope Supplier, Technical Workshop, Plastics CAT Supplier, and Information about the feed feeder has been collected. Information about this matter is connected to the accompanying supplement.

It is shown in the following table that it is available as a solution for the monsoon period for Parbhani district.

Information about the search and rescue measures:

	Name of the Equipment			Quantity.	Office of the delivery of Equipments
1	Inflatable Boat with OBM Motor (Yamaha)				1) PCMC, parbhani. 2) Pathri munciple council 3) Sonpeth munciple council 4) Purna munciple council 5) Purna munciple council 6) Gangakhed munciple council

DDMP OVERVIEW AND OBJECTIVE:

The layout for their separate compartment has been prepared from all government offices in Parbhani district. The office number of the office has been taken by appointing one nodal officer in each office. The information in this book is shown in the presentation book. Village Disaster Management Committees have been established in 852 villages in Parbhani district. Also, the village disaster management response team has been identified. Trained teams have been constituted for the victims of disaster relief and rescue in the district. Officers / employees of different departments and volunteers have been specially trained in the district for the rescue. In the Collectorate office, 24 hours control room was started and the telephone no. 1077 (02452-226400) in addition to the Irrigation Department, Health Department, Home Guards The control room for office, electricity distribution company and irrigation department (ZP) has been operational for 24 hours. Similarly, taluka control room has been implemented for 24 hours at Tehsil level at Tahsildar office.

Multipurpose Disaster Response Plan:

Earthquakes, floods, storms, epidemics, industrial accidents and fire. Disasters have been included in the District Emergency Management Plan. Some disasters, such as floods and earthquakes, were large-scale, financial, and environmental harm, and disasters such as epidemics do not only harm the lives, but also require large number of facilities and manpower to control any disaster.

The main policies for building a District Disaster Management Plan, mainly, the protection of live losses, property damages, finance and environment. Also, to reduce the intensity of disaster, preparing to respond to the disaster, to create awareness about various disasters, to rescind victims, find immediate help and rehabilitation.

Objectives of District Disaster Management Plan:

facilities available through the participating organizations in disaster management programs and to use them to increase the efficiency of the district administration in disaster management, it will help the district administration to face the disaster efficiently and build confidence in the various levels of society. Use the information prepared by the emergency action plan for various developmental schemes in the district. Geographical information

system use of scientific and technical information in remote sensing system (etc) to make this plan and for long term developmental schemes. To prepare a plan for keeping the information about the disaster that can occur in future in the district, update the information, adjust the responses, and suggest new improvements and create a network of related information. To make use of District Disaster Management Action Scheme for various policies of the Government of Maharashtra. If there is no emergency prevention plan, then there is a possibility of disaster relief. There is a possibility that there is an unnecessary emphasis on certain issues and there is a possibility that some things may be neglected.

The purpose of the Disaster Management Action Plan is to focus attention on the disaster-prone areas and to manage the disaster-stricken parts, not to lose the least livelihood, environmental, and financial loss. A formal plan for disaster management is necessary for this.

Earthquake:

In the view of the earthquake, Parbhani district is prone to earthquake prone area No.3 (moderate risk). However, this should be done in the form of earthquake-resistant houses from last 3 years. Training by District Disaster Management Authority for the last three years, regarding the action done by District Disaster Management Authority in Parbhani district, to Talathi, Gramsevak, teacher, student, Sarpanch, Panchayat Samiti members, government employees and officers and services. Has arrived.

Storm:

In the case of the storm, the storm is prone to prone zone 3 (moderate risk). In view of the stormy volcanic eruption of the district, there is no major storm in the district till now.

Diseases:

Part of the district eg Godavari, Dudhna and Purna are the prevalent areas of major rivers. In addition to this, there are two major drains of Indigani and Pingalgarh and some parts of canal and dam catchment areas, apart from Borna, Masoli, varieties, Karpara,

Kasurra tributaries. Therefore there is a possibility of causing great epidemic disease during monsoons.

Since the tap water supply scheme is very small in the village, there is a possibility of causing pandemic disease due to which the majority of people use well drinking water, because the system of sterile disinfection is limited. Causes of epidemics occur largely due to lack of proper housing facilities. Public awareness is being made especially in the way of the river banks, as a remediation plan.

Road Accidents:

A wide network of roads is spread over the district. The National Highway No. 222 from the district is from Kalyan to Nirmal and other state highways. There are many small villages near the road and many other reasons have caused the accident due to large number of accidents and the number of tankers, trucks transporting the heavy vehicles from this route is in vogue.

Therefore,an accident can lead to live and financial loss.20 to 25 km of accidental accident on this route. Ambulance and dispensaries and NGO volunteers are available in the area to help.

In severe cases, patients can be admitted to civil hospital and other private hospitals for modern treatment.

Disaster vulnerability:

The prevalence of Disaster and possible prevalence of Disasters is as Follows

	Damage	Disease / Disease	Industrial chemical accidents	Fire	Road accidents
Injured		Medium	Minimum	Medium	Medium
Loss of wealth		Medium	Minimum	Medium	Medium
Cattle and livestock		Medium	Minimum	Medium	Medium
Crop Damage		Medium	Minimum	Medium	Medium
Livelihood		Medium	Minimum	Medium	Medium
Disrupted		Medium	Minimum	Medium	Medium
Disrupting social life		Medium	Minimum	Medium	Medium
Damage to live devices		Medium	Minimum	Medium	Medium
Disrupting the service		Medium	Minimum	Medium	Medium
Loss of infrastructure and loss of government system		Medium	Minimum	Medium	Medium
The consequences on the national economy		Medium	Minimum	Medium	Medium
Social psychological consequences		Medium	Minimum	Medium	Medium

Problems with Disaster Incidents May be Interrupted and Services may be Interrupted

Chances of Hurt	Earthquake	Flood	Cyclon Storm	Disease / Disease	Chengara Chengrai stammed	Industrial , chemical accidents	Fire	Lightning	Road accidents
Freight system (road network)	Minimum	Minimum	Minimum	Minimum	Minimum	Minimum	<u>Medium</u>	<u>Medium</u>	<u>Medium</u>

Potential Assessment:

1) Assessment of resources and supply: -

Valuation of available resources and supply is essential for the assessment of capacity in particular the district is more sensitive for the disaster. It is necessary for the resource to be planned for the movement of government and non-government resources during the disaster.

Contacts and Media: -

The following sections and technologies are available for disaster monitoring and reconciliation

1. Group Media
2. All India Radio
3. Telecommunication Centers - Performance centers

Various News Papers of The District:

1. Administrative Vigilance
2. District control room: - A control room has been set up under the supervision of resident Dupt-collector at the Collector Office and at Taluka level.

Pre-Disaster and Training Program: -

Disaster Management Committee is organized at district taluka and village level, organizing training workshops for district taluka and village disaster management plan, officers of district and taluka level, training and workshops for talathi, gramsevak, policeman and sarpanch.

Disaster Quality Assessment:

Godavari, Dudhna, Puran Flood conditions can be created in the district and information is given in the villages on the river bank by providing details of the Yeldari dam from the dam. Every month, in the month of May, a review meeting of the district

administration is held under the chairmanship of the Collector, in order to meet the possible recurrence of this situation,

Various measures and preparations to be done have been taken into account, which is planned to coordinate the work done by the various government departments and the NGOs in respect of the work to be undertaken in the event of actual rebirth. District control rooms and Taluka control rooms are being implemented throughout the year and at that time the appointment of 24-hour staff is given to the District Control Room and the police station is received from Taluka control room and from there to the village level.

Proposals are given on the village level by giving radio and boasting. Similarly, the Zilla Parishad Primary Schools are made available to the villagers.

Map of rivers and flow viewers of Parbhani district

Affected Villages And Flood Control Information:

Parbhani district has total 9 talukas and according to the census of 2001, the population of the district is 18,35,982. On the 26th and 27th of July 2005, there was a lot of rain in Maharashtra. Godavari river was flooded due to heavy rain between 27 July and 2 August 2005.

Paithan dam, total 2615.16 lakh cusecs from Jaikwadi dam water was released. So 20 villages had under of the flood. The contact of 48 villages was broken. Similarly, due to heavy rainfall and floods in the district on August 5 and 6, and due to water released in the Godavari river from Jaikwadi dam, 172 villages in 9 talukas of the district are affected. The district has an average of 343.1 mm in two days. It was raining. Due to floods, 15 villages in the entire district were completely old, and the contact with 44 villages was broken due to flood. The Preventionist Plans have been prepared for the availability of equipment and manpower available for the purpose of prevention of Yeladri on Purna river in the district.

The doors are open for the purpose of planning and self control during the rainy season. If there is a change in water from the dam of large medium and small project in the floods and from time to time, due to emergency situations, there is a possibility of some water leakage in the river belt in case of security of the dam. At that time, due to the erosion left by the dam, and the danger of flooding in villages in the river lines in the highways. Specialty villages, Godavari, Dudhana and Purna are more prone to this danger, so villages with the risk of floods in the district have been decided.

Dams in Parbhani District:

The details of the collection of reservoirs which are influenced by the district's ecological conditions are as follows.

	Dam / Project name	River name	The total Water capacity of the dam		
			Total capacity(TMC)	Dead stock up	Total suitable capacity
	Yeldari Dam	Purna river	9 25.00	24.00	01.00
	Siddheshwar Dam	Purna river	250.00	69.00	1.00
	Maajgalon dam	Maajgalon dam	458.00	46.00	12.00
		karpara	28.820	3.9 27	4.9 00
	Masoli dam	Masoli River	34.081	6.9 40	7.141
	Jaikwadi (Paithan)	Godavari			
	Irrigation Project (aggregate 21)	River name	40.315	3.622	6.6 9 3

1. Possible reasons for flooding in Parbhani district:
2. Through the flood due to excessive river flooding.
3. Because of leaving excess water from the Jayakwadi Dam.
4. Due to abandoning water from the Yeladri dam.

VARIOUS HAZARDS:

Earthquake:

If there is an earthquake in the district, then the Sub-Divisional Engineer, the Superintending Engineer, Irrigation Board, and the Executive Engineer, the Irrigation Department, informs them. After receiving information about the shock of the district administration, the information is received from the concerned Tehsildar.

If there is no shortage of earthquake loss, then if there is a possibility of large-scale earthquake losses in the next period, due to the proper vigilance, the instructions are given on radio and village level.

Storm:

In the rural areas of the storm, there are large number of houses with stone clay and paper roof. During hurricane, it is possible to get rid of weak houses and cause injuries or death. If there is a preliminary notification of storm by observing the school, arrangements are made to give instructions to all the Tahsildars on the village level, and to provide prompt instruction for transplantation of the weak and paper households at village level to safe place.

Epidemic disease:

The effect of some known-unknown waterborne diseases in the monsoon season. E.g. During the pre-Summer period, due to mosquitoes, some diseases spread to the district and the number of diseases of pandemic is shown to increase. Gastro, cholera, diarrhea, malaria, pneumonia, jaw etc. Recently, the work of controlling diseases of choline and bird flu in connection with these infectious diseases is felt by the concerned government department, although there are many ways to deal with these disasters. Preparation and awareness building are being done in Parbhani district.

Malnutrition in the district is a serious matter. The number of undernourished children in tribal areas of the district is quite good. Because of superstition and religious beliefs, people in some areas are unhappy with the benefits of the available medical services.

Various workshops are organized by conducting training for water purification. Various water samples are inspected in the district. Similarly, the Disease control room has been set

up under the control of the District Health Officer and if the epidemic occurs then the action is taken quickly.

Road Accidents:

There are wide network of roads in the district. Due to urbanization of the road from the district, many tankers transporting dangerous chemicals from the highway are likely to be hit due to the large number of accidents due to accidents and the risk of live harm. Therefore, it can also lead to accidents and financial losses. If this accident occurs on the highway of the highway, then 25 to 30 Kms. Ambulance and dispensaries are available in the area.

In the event of severe injury, patients can be admitted to the Civil Hospital and other private hospitals for the treatment of modern patients. The highway police has a police station. It can also be used to help with the occurrence of road accident. NGOs in the district

Ambulance is being operated by this service. In this case, the services are filed by the patients in the nearby rural hospital, primary health center and district hospital Parbhani to the patients of the accident.

Some villages in the district are recognized as frequent accidents. This shows that it is not very comforting. Road accidents negligently driving the vehicle, youthful enthusiasm, driving alcohol, not maintaining proper vehicles and carrying more goods than the vehicles etc. It comes from many reasons.

Street Viewer Map in District:

The Highway Police's traffic aid chowki is functioning at Zilla taluka. Road to Highways People injured in an accident in health center and in a private hospital, are immediately moved to the hospital. Also, public transport is done by the traffic department for safe transport.

Industrial and Chemical Accidents:

There are no industries in the chemicals that are dangerously dangerous. In order to safeguard the security of industrial safety and health directorates are conducted regularly and monkey training (color training) is organized.

Fire extinguishers can be used to extinguish the fire of the fire brigade of the municipal corporation, and gas firms are lured to avoid domestic gas accidents. In the absence of fuel, the fires are used by the forest department to train trained manpower and equipment.

Redemption Scheme:

Creative measures

1. To ensure that there is no visible impact on the construction of dams due to earthquake activity in other areas of the district, and if necessary, appropriate measures should be taken to look into dam safety.
2. To fix the entire lines of the villages that are affected due to the flood on Godavari,

Dudhana and Purana river Banks.

1. The construction of a new bridge at the old bridge in the river channel and due to its inconvenience to the old
2. Unauthorized constructions in river basins should be demolished.
3. Encroachments in river basins should be drawn so that no interruption of river bed can be created.
4. Maintain proper care of the earthquake apparatus.
5. If the nearby houses are cracked, then the information should be collected and the technology of earthquake construction should be made known to the people.

Other measures

1. It is necessary to cut down the acrid shrubs grown in the river bed.
2. It is necessary to use the encroachment program situated on the river bank.
3. The patrol should be started on the main highway for safety.
4. Gram Panchayat employees should be trained to organize workshop on water purification system.

NGOs should be helped to get food during the flood like flood.

Understanding the importance of disaster management, Parliament passed the Disaster Management Act of 2005, according to the law, National Disaster Management

Authority, State Disaster Management Authority at the State level and District Disaster Management Authority at district level.

Preparation of Disaster Management Plan Providing funds in respect of this, the development plan of various departments is in conformity with disaster management, such as the State Disaster Management Authority's functions. The creation of District Disaster Management Plan, the National and State Authorities have the functions of the District Disaster Management Authority to follow the guidelines set out for disaster relief, alertness and response. District Collector of District Disaster Management Authority is the President.

- 1) The responsibility of the District Collector.
 - 2) Preparation of District Disaster Management Plan with the help of District Disaster Management Authority.
 - 3) To establish district control room.
 - 4) Coordination of various government and non-government organizations.
 - 5) To collect necessary information from the control room of all the talukas control rooms and other local self-government organizations in the district.
- Guidance by visiting the affected places personally.

District Disaster Management Authority

Disaster Management Act 2005 Case No. 4 District Disaster Management Authority has been established in the district as per DEMU 2006 / Proc.10 / DM-1, dated 01 June 2006 and its structure is as follows. The District Disaster Management Authority includes the following members.

Collector	Designated President
District ZP President	Designated President.
Chief Executive Officer, Zilla Parishad	Member.
District Police Suprintendant	Member.
civil Surgeon	Member.
Executive Engineer PWD Department	Member.
Executive Engineer Patbandhare	Member.
Resident Deputy Collector	Chief Executive Officer.

Powers of chairperson of District authority:

- A. According to section 26. (1) The Chairperson of the District Authority shall, in addition to presiding over the meetings of the District Authority, exercise and discharge such powers and functions of the District Authority as the District Authority may delegate to him.
- B. The chairperson of the district authority shall, in the case of an emergency, have power to exercise all or any of the powers of the district authority but the exercise of such powers shall be subject to ex post facto ratification of the district authority.
- C. The district authority or the chairperson of the district authority may be general or special order, in writing such or delegate of its or his powers and functions, under sub section (1) or (2) as the case may be to the chief executive officer of the district authority, subject to such conditions and limitation, if any as it or he deems fit.

D. 27 the district authority shall meet as and when necessary and at such time and place as the chairperson may think fit.

E. 28(1) the district authority may, as and when it considers necessary, constitute one or more advisory committees and other committees for the efficient discharge of its functions.

(2) The district authority shall, from amongst its members, appoint the chairperson of the committee referred to in sub section (1)

(3) Any person associated as an expert with any committee or sub committee constituted under the sub section (1) may be paid such allowances as may be prescribed by the state government.

Rights and Duties of Authority

1. To advise the various authorities and local bodies at the district level regarding disaster prevention and other measures to reduce the intensity of disaster.
2. To prepare the Disaster Management Plan, to set up guidelines on district level government departments and local authorities in the district.
3. To monitor the implementation of the Disaster Management Plan prepared by district level departments.
4. Organizing and supervising special training programs for different levels of officers, employees and volunteers who work in the district.
5. To find out the necessary mechanism for the disaster preparedness, to look after it, to inspect it, to update it and to get the right information available to people. Monitoring the situation that fades the reaction in case of any disorder in case of disaster or actual catastrophe.

District Control Room:

1. The district control room is under the control of the Collector. Its important work is
2. To keep control.
3. Coordination.
4. To implement the action program in disaster management.

Functions of the District Control Room

1. To ensure that all the contact machinery and resources in the district are in good standing.
2. To collect information regularly from various local control rooms in the district.
3. To make the necessary changes in the District Disaster Management Plan from time to time.
4. To report the changes mentioned above to the emergency action center and YASHADA.
5. To take training programs of various government and non-government departments in the district.
6. To evaluate the disaster relief measures.

Preparation of district level disaster incidents and submission of that information to emergency action centers.

Measures taken for disaster management in the village

A total of 852 villages in Parbhani district have been prepared for disaster management plans. This includes the action of content response materials available in potential threats and disaster history. Similarly, the population of the village, school, high school, colleges, anganwadi, social workers, moneylenders, vacant, safe accommodation for temporary residence, hospital, public health center, primary health center, veterinary dispensaries, medical dispensaries, Collect information about swimmers, telephone numbers available in the village, medical shops, cottage shops, electrical generators, focus light, flashlight, radio, television, megaphone, sion, bus, zip, tractor, truck, jcb machine boat, bicycle vehicles Has

been there. This information is mentioned in the various supplement attached to this plan. Blake Suppliers, Wood Suppliers, Bamboo Suppliers, Wholesale Food Stores, Tents Suppliers, Private Mails, Sets Suppliers, Private Freight Institutions, Information about water suppliers, blood banks, mattress suppliers, iron pipe suppliers, dome suppliers, technical workshops, plastic sizers, feed feeders The information related to this information is linked to the accompanying supplement.

A life jacket is available for Parbhani district and life ring is available. All the Government Offices in Parbhani district have been prepared for this plan. The office number of the office has been taken by appointing a nodal officer in each office. The information about it is shown in the presenter's book.

Multipurpose Disaster Response Plan:

Earthquakes, Floods, storms, epidemics, industrial accidents and fire. The disasters have been included in the District Emergency Management Plan. Some disasters such as floods and earthquakes occur on large underground lands. There is a large number of live, financial and environmental hazards. Disasters like epidemic disorders do not only cause harm to life but also require large amounts of energy and manpower to control any of the disasters.

The main policies for building a district disaster management plan are the protection of life, finance and environment. They are also to reduce the intensity of disaster, to respond to the disaster, to create awareness about various disasters, to rescue the disaster victims, to provide immediate relief and rehabilitation.

Fire:

In many areas of the district there are medium-sized fire incurred. Every year around 40 or 50 cases of fire are reported. Most of the events occur in the summer due to flowing winds. The incidents of fire in places like cotton mills, cotton holders / farmers harvested in cotton, fodder processing plants, huts, etc. are frequent. The solution to tackle the fire accidents in most theaters in the district is inadequate / time-consuming. Fire control system is available in the municipal city and eight municipalities at the city level. But this requires a lot of trained manpower.

Road accidents:

Some villages in the district are known as frequent accidents. This shows that it is not surprising that the percentage of accidents prone to disruption in the district is not very surprising due to road accidents, driving the vehicle negligently, youthful enthusiasm, driving alcohol, driving vehicles without proper maintenance, etc. Due to many reasons.

Drought:

The district is generally drought-prone. In most parts of the district, ground level is deep in some talukas. In some talukas, there is a high chance that water will be available within 100 feet of normal water. Also, due to the use of agriculture / drinking water as well as the shortage of drinking water, it is due to summer tremors in most parts of the district Parbhani city is experiencing a shortage of drinking water every year. It is necessary to make remote arrangements and arrangements. Environmental imbalance Due to the lack of necessary and effective arrangements for disposal of trees, open drains, waste disposal of the district, it is more likely to spread the disease. Due to tree breakage, due to increase in soil moisture, poor condition of rain, water scarcity, etc., and other reasons, to maintain district planning environment Public awareness is being done. Due to large number of adulterated fuel is used in vehicles throughout the district. So air pollution has increased. It is necessary to note the sound pollution besides this.

Construction, Roads:

Most of the houses in the rural areas / villages of the district are of the soil. The extent of which is believed to be partially the risk of damage to the earthquake and earthquake. Most of the villages on the banks of the river have contact roads. And because most of these roads are low in the highway, they are very much needed to get out of this village due to the height of the bridge. Road condition in rural areas is not satisfactory; regular roads are required to be repaired.

Earthquake:

District does not break into earthquakes. Some villages in the district had experienced mild shocks during the earthquake in Killari district of Latur in the year 1993. There is no record of damaging earthquake in the district yet.

Cyclones:

In the district, there are cyclones in the district and the loss of livelihood and livelihood of the fields of fruits, orchards, and sometimes some time. The cyclones mainly occur in the summer. But there is no rule of rebellion. Such storms have occurred during monsoon and summer.

Institutional / Basic Structure for Disaster Management:

In the disaster management, various governmental / semi-government departments are involved in the organization, mainly in the state district and the place of disaster. These are the level of State Level Machinery Policy / Policy Assessment tool. Provide funds and control, directing and evaluating works etc. District level machinery sets the priority of planning and distribution of equipment and control, direction and evaluation through District Disaster Management Centers etc.

1. The Disaster Management Act 2005 makes provisions for efficient management of disasters and related matters and such factors as the possibility of disaster or the possibility of occurring.
1. District Disaster Management Authority, whose President District Collector and Chief Executive Officer Resident Deputy Collector are these. There are various members of different departments.
2. Certified procedure system has been implemented for various departments.
3. A senior officer has been appointed as the nodal officer of the department for disaster management through various departments. It is important to exchange information of various departments in District Disaster Management Center.
4. Information related to the tools and training of various government departments in the district is compiled on this website.
5. Volunteers have been trained and trained in emergency and emergency accommodation in the district, provision for temporary shelter management, first aid etc.
6. Distribution of Disaster Management Committees and Disaster Management Action Branches has been established in Gram Panchayat / Village in district (713/852). Their training program is being organized by trained person and volunteer.
7. Districts level taluka level and village level officers and staff as well as students of National Service Scheme have been trained for various activities of disaster management.

8. Dissemination system has been updated in the district control room for disaster management and also has been implemented free of cost for telephone number 1077.
9. The research and rescue work of the district, taluka level, voluntary organization, municipal corporation, municipalities, training and training of the district has been made available for the search and rescue work.
10. In past few years (2006), flood protection has been planned in 172 villages.
11. The list of telephone / mobile numbers of the necessary equipment / facilities supplied by the State, Department, District, Taluka and Village level for the purpose of disaster management, in particular, has been prepared.
12. The employees of the corporation have been trained on fire related issues.
 - In the District Disaster Management Cell, the following telecommunication and technical facilities are implemented.
 - National Informatics Center (NIC) Satellite Communication Connection to District Headquarter.
 - Use of police wireless messaging system.
 - Telephone contact with all the Talukas headquarter.
 - Contact with all the Talukas and villagers through wireless messaging system.
 - Fax and e-mail and mobile telephone contact with various offices.
 - During the calamity, AIR, Newspapers and Cable TVs Broadcast of the instructions through the medium.

 - Contact with Departmental Revenue and Ministry of Finance by phone.
 - Message system / Disaster information is reported to the following sections
 - Chief Secretary
 - Principal Secretary, Assistance and Rehabilitation Works
 - Departmental commissioner
 - Divisional commissioner
 - All government officials in the district
 - District Guardian Minister, District Council President, MLA, MP

Private Service Provider:

During the disaster period, the Divisional Commissioner plays an important role in the following ways. Provide the necessary equipment in the disaster-prone district in the

adjacent districts of the district. During the disaster period, the Chief Secretary, Principal Secretary, Assistance and Rehabilitation Department and emergency action center are in constant touch and provide the necessary tools to help.

Center for Disaster-based Activities: -

Disaster Action Centers have been set up at the place where help is made at the place where there is a disaster. In large-scale disasters, transit camps are set up. The number of centers in the disaster area depends on how big the disaster is. The responsibility of this center is entrusted to sub-divisional officer level officer. After completion of help and rehabilitation work, these centers and transit camps are closed.

Action Center at the site of the disaster

1) Respond	2) Contact	3) After disaster
<ul style="list-style-type: none"> ➤ Rescue ➤ Dispose of the deceased ➤ Infection. ➤ Food and cooked food supplies 	<ul style="list-style-type: none"> ➤ Disaster disaster management cell ➤ District control room ➤ Transport Officer ➤ Non-Government Organizations 	<ul style="list-style-type: none"> ➤ Source supply ➤ Financial help ➤ Contact District Control Room ➤ Medicinal Supplies ➤ Disposal of waste

Rehabilitation camps :

The need for immediate transition camps to combat disaster and to prevent life and livestock are required. Transit camps are created as per the disaster prone population. A Tehsildar officer is appointed as the transit officer for supervision of this transit camp.

Reconstruction and Reconstruction Plan:

1. In the disaster period, the life of the affected population is started in a normal manner with a short-term re-annuity. However, in order to make their life more flexible, long-term re-evaluation and rebuilding programs are necessary, the re-creation and pre-planning form include the following components.

2. Reinstatement of Infrastructure Facilities: Restoring facilities like roads, railways, water supply, electricity supply, telephone etc.
3. Repair and reconstruction of important public services like related to health, school etc.
4. Insurance plan: - Benefit from the direct benefits of various schemes such as insurance plan, farmer insurance plan pickup insurance scheme
5. Short-term debt: - To recover the lives of the injured persons in emergency, they need to have an easy and easy loan.
6. Microfinance, encouraging private finance institutions to provide financial support to the affected people.
7. Assistance and subsidy: - Allotment of subsidy related to grants and assistance to the government by the government.
8. Medical rehabilitation: - There is a medical requirement for various types of different types of disasters and different duration. E.g. The effects of a nuclear disaster are long-term and require long-term medical attention.

Mental rehabilitation:-

There is a large number of mental traumas in relation to the disaster period. At such times they need mental support and psychotherapy. To provides them with services of psychiatry, to divert their minds, to provide employment opportunities, to provide recreational equipment etc. The solutions can be made.
